

MiTOWER STAIRS

✓ Professional use

- Working safely on a staircase
- Single person assembly
- Stable, strong and robust
- Extension set for MiTOWER and MiTOWER PLUS

Altrex MiTOWER STAIRS

The MiTOWER STAIRS is an extension of the MiTOWER and MiTOWER PLUS. Only one person is needed to assemble this compact scaffold in a stairwell. Safe and fast. Thanks to this intelligent application, unsafe working on a staircase is a thing of the past.

The intelligent design of the MiTOWER forces you to build the mobile rolling tower safely. Platform girders and a unique suspension mechanism in the platforms give you maximum grip and make it extra easy. Double guardrail braces, a handy claw system and double braked castors mean that the mobile scaffolding is one of the most stable of its kind.

Working safely on an uneven level

With the MiTOWER STAIRS, you can work safely on an uneven level. Stable all the way to the top.

Compact and easy to place on a staircase

The compact design means that the MiTOWER STAIRS is the ideal scaffold to move into a narrow stairwell.

A handy extension

The MiTOWER STAIRS is available as an upgrade for both MiTOWER and MiTOWER PLUS.

Strong and stable

Circular welded and pinched claw-brace connections turn the MiTOWER STAIRS into the strongest, most stable scaffolding of its kind.

Unique suspension mechanism

'Extra hands' to hang materials during the construction and dismantling of the MiTOWER STAIRS. Slides in and out in a single, quick movement.

Your MiTOWER STAIRS, your identity

Make your MiTOWER STAIRS recognizable using the logo, name and colours of your business. So that you are visible on every level.
